

MJBA2200 Heavy Duty Turnbuckle Jib Crane

Knight Global's MJBA2200 Turnbuckle Jib Crane is ergonomically designed to accommodate workstations where ceiling heights are inconvenient for an overhead crane system. This series offers a large tool coverage area with a single rotating rail on a floor-mounted pedestal. It also has a level adjustment screw used to adjust the pitch of the rail and an adjustable hard stop.

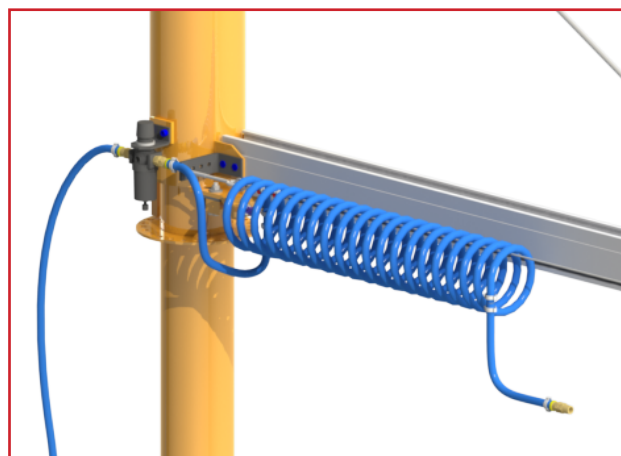

Knight Jib Cranes have Timken® Tapered Roller bearings that provide a smooth 360 degree rotation and have boom lengths available up to 10 ft. [3m].

MAX. BOOM LENGTH: Up to **10 ft. [3.0m]**
MAX. CAPACITY: **745 lbs. [337kg]**

Features & Benefits

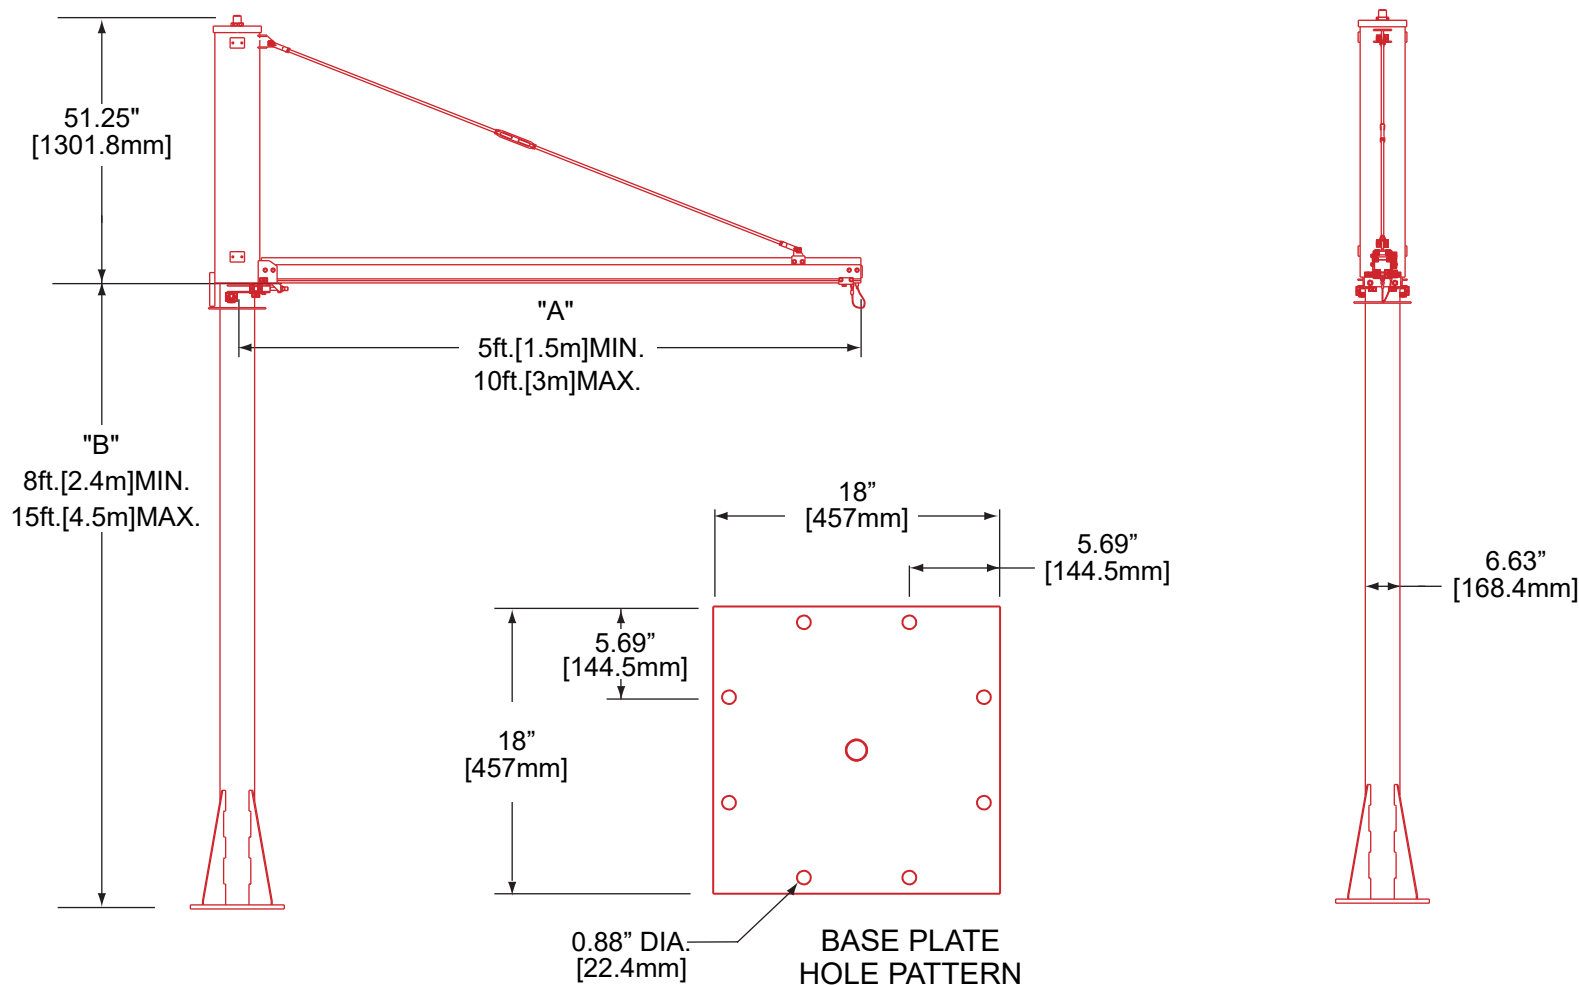

- For low headroom clearance applications.
- Timken® thrust bearing design eases rotational effort.
- Level Adjustment End Bracket used to adjust pitch of rail.
- 360 degree rotation (Optional Fitting #JSA9137).
- Maximum Under Rail Clearance Height:
Up to **15 ft. [4.5m]**.

Optional Hose Management: Part # JSA9135
