

RKBA Reeved Cable Air Balancer Series

Air Balancers are used in applications where a "float" condition is beneficial. Float allows for the hands-free final positioning of an object. The up/down speed of a air balancer is quicker when compared to a hoist and allows for a "feathering" operation when locating the load. The pendant controls are ergonomically designed incorporating color coded thumb levers. Reeving a air balancer increases the mechanical advantage of the product.

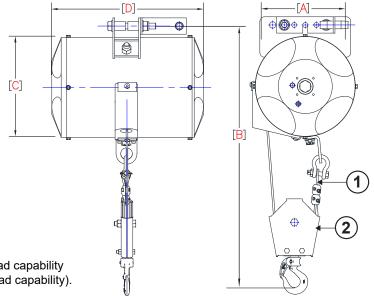

Additionally the reeve and pulley offers a second suspension point which gives greater stability to the load. Reeved air balancers come standard with a 1 ton spring lock bail hook.

Reeved Cable Air Balancers use a carbon steel Galvanized Independent Wire Rope Core (GIWRC) with a minimum breaking strength of 1815 kg (4000 lbs) and an actual test breaking load of 2687 kg (5923 lbs.). The 1/4" (6.35 mm) cable has a minimum breaking strength of 3175 kg (7000 lbs.).

Formula for Air Balancer sizing:

Example: plant air 80 psi, 350 air balancer, 80% load capability (0.80 air supply x 350 lbs. = 280 x .80 = 224 lbs. load capability).

Rated at 100 PSI

MODEL#	RATED CAPACITY lbs [kg]	TRAVEL in [mm]	(A) in [mm]	(B) (min.) in [mm]	(C) in [mm]	(D) in [mm]	UNIT WEIGHT lbs [kg]
