

MJBA2700 Heavy Duty Low Profile Jib Crane

Knight Global's MJBA2700 Jib Crane offers a large tool coverage area with a single rotating rail on a floor mounted pedestal. Knight cranes are ideal for short transfer applications and are designed to move effortlessly while still carrying large loads.

The MJBA2700 Jib Crane has Timken® roller bearings and the round post allows for 360° rotation.

Jib Cranes allow for maximum hoist height on low head room applications or when the overhead working space can not accommodate a rail system.

MAX. BOOM LENGTH: Up to 20 ft. (6.1m)

MAX. CAPACITY: 2030 lbs. [920kg]

Features & Benefits

- Level Adjustment End Bracket is used to adjust the pitch of the rail.
- Round post allows for 360° rotation.
- Adjustable Hard Stop
- Ergonomically designed for low headroom clearance applications.
- MRES7522 Telescoping Rail is optional.
- Maximum Under Rail Clearance Height: Up to 15 ft. [4.5m].
